EARTEC

Streamline Service

Eartec restaurant intercoms are designed to **streamline food service operations** through crystal clear, radio communication. Each restaurant system consists of Scrambler UHF high band transceivers and a combination of specialty headset accessories.

Operation of the Scrambler system is "simplex", that is when one member in a group transmits, the message is received by everyone.

Transceiver Features:

No FCC Licensing Or Fees

Ready to go right out of the box. No licensing paperwork or additional costs necessary.

Outstanding Range

UHF high band signals transmit clearly in multi-level establishments, through concrete, even steel.

No Interference!

Scrambled transmissions and digital receive tones guarantee complete privacy.

Channel Selectivity

Channel selection allows creation of different teams, ie. waiters on channel 1, kitchen staff channel 2, managers channel 3 and so on. This makes it possible to coordinate an entire staff with the simple turn of the channel dial.

Excellent Voice Tone

Fine-tuned receive circuit provides optimum voice reception with any Eartec headset.

SCRAMBLER

At the heart of each complete restaurant communication system is Eartec's new Scrambler SC-1000 two-way radio. This UHF transceiver is the best on the market because of its **simple operating design and rugged construction**. There are no complicated buttons and adjustments that can be hit by mistake, just honest simple punch-out transmit power, an ON / OFF volume dial, and channel select switch. With a range up to one mile voice signals remain crystal clear, even when transmitted through concrete and steel walls.

Standard desktop charger.

Scrambler SC 1000 . . \$125

...Turn Tables with Precision

The beauty of the Eartec program is that you can easily design a wireless system that will increase team efficiency which will go right to your **"Bottom Line"**. Radios and headsets can be purchased individually or as a package.

Call Eartec for **expert advice** as to which combination of headsets are right for you, or order online at www.eartec.com

The SST . . \$49.50ea
Clear audio tube w/earbud.
