Innovative Solutions to Boost Productivity

SCRAMBLER

The Scrambler UHF is a compact, professional two way radio designed for office, factory or on-location communications. All SC 1000 transceivers operate in a "Simplex" mode, which means that when one person in a group transmits everyone receives the message. The Scrambler enhances productivity, and will help transform any organization into a "Lean, Mean, Fighting Machine" !

Transceiver Features:

No FCC Licensing Or Fees

Ready to go right out of the box. No licensing paperwork or additional costs necessary.

Outstanding Range

UHF high band signals transmit through concrete, range is up to one mile!

No Interference!

Scrambled transmissions and digital receive tones guarantee complete privacy.

Channel Selectivity

16 UHF frequency combinations allow multiple groups to operate without interference.

Expandable

Add stations to an existing Scrambler intercom without system modification.

Channel Enunciation

System automatically "tells" the user to which channel the radio is tuned.

Industrial Headset Jack

Robust dual pin design.

Excellent Voice Tone

Fine-tuned receive circuit provides optimum voice reception with any Eartec headset.

Compact radio fits in palm.

Includes military belt clip.

Inline Push-to-Talk.

Scrambler SC 1000 . . \$125

Shown in desktop charger (included).

Innovative Solutions to Boost Productivity

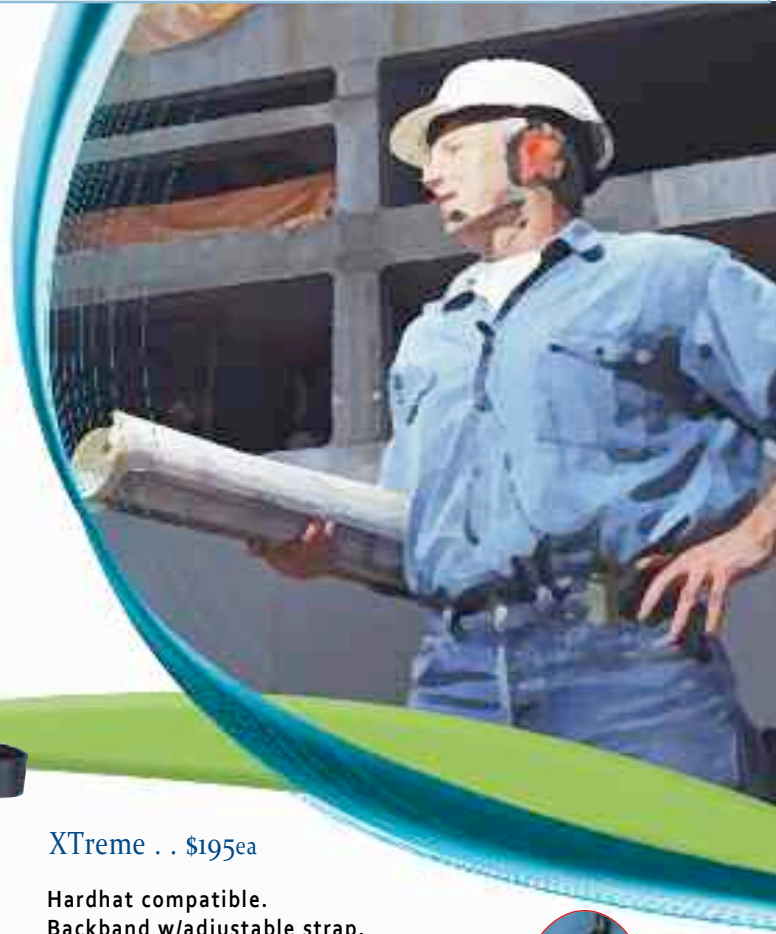

Heavy Duty Series

Eartec Heavy Duty headsets are built to withstand the "hard knocks" of industrial use. They feature rugged plastics, deluxe padding, and state of the art electronic components. Whatever the task these heavy duty headsets provide outstanding wireless communication and will help you tackle the job.

XTreme . . \$195ea

Hardhat compatible.
Backband w/adjustable strap.

Scrambler UHF transceivers and Eartec Heavy Duty headsets are a dynamite combination. A full line of top quality Eartec headset options are available.

Heavy Duty headsets include inline PTT.

Ultra Double . . \$145ea

Industrial Dual Ear.
Contoured foam padding.

ProLine . . \$110ea

Popular Pro Audio.
Deluxe ear cushions.

Slimline . . \$75ea

Spring steel headband.
Combines comfort & durability.

Plant Tour System

Eartec Wireless Systems enhance the effectiveness of plant tours by overcoming the din and clatter of ambient noise through wireless voice communication. All complete touring wireless include a combination of Scrambler transceivers and lightweight Monarch headsets.

Designing a Plant Tour Wireless...

...is as Easy as 1, 2, 3!

1

SELECT ONE SC 1000 FOR THE TOUR LEADER AND ALL GROUP MEMBERS.

- Miniature transceiver is worn on belt or inside shirt pocket.
- Channel selectivity allows multiple tours.
- An unlimited number can operate together.
