

SIMULTALK 24G SYSTEM

MULTI-STATION SETUP

The Simultalk 24G system can be expanded by adding remote radios and headsets to the base 2-person set. In this configuration, the master radio is able to communicate hands-free with an unlimited number of remote transceivers. Remote users set their radios to "standby" (listen only) and can all monitor the master. Remote users can have a two-way conversation with the master by switching to "full transmit" one at a time.

"Talk" BUTTON adjusts to either transmit or listen-only mode.

Simultalk 24G

HANDS FREE FULL DUPLEX WIRELESS

SIMULTALK 24G SYSTEM

SIMULTANEOUS TALK
WIRELESS COMMUNICATION

www.eartec.com

Hands free wireless communication

The Simultalk 24G is a breakthrough full duplex wireless that provides hands free, two-way voice communications. This revolutionary intercom is not voice activated and there are no buttons to push. To operate simply turn the radios on, and talk, exactly like on a wired system.

With an operating range of up to one quarter mile the Simultalk 24G is the ideal solution for people that need to communicate and work with their hands at the same time. The system operates without a base station, in the 2.4 GHz frequency range so it is free from licensing worldwide.

Simultalk 24G ... \$125

No Buttons to Push

Full Duplex, Simultaneous Talk

Lightweight, weighs only 4.5 oz.

>> 2 Simultalk radios ... \$125 ea

>> 2 Headsets ... \$_____ ea

Batteries, Chargers, Padded Case included

HOW FULL DUPLEX WORKS

The Simultalk sends & receives messages concurrently utilizing two different frequencies. This full duplex format allows partners to talk simultaneously without pushing buttons.

Multiple Headset Options

Eartec offers a full line of lightweight and heavyduty headsets that connect to the Simultalk transceiver with a single 3.5 mm plug. This allows each customer to select the best headset style to fit their particular application.

Lightweight headsets are designed for use in environments with low to moderate ambient noise, or wherever discreet wireless communication is needed.
